

UNIT 1 - LESSON PLANS

Class Algebra 1 **Topic** U1 – Adding and Subtracting Real Numbers **Lesson** 5 **Of** 9

Objective	Students will: <ul style="list-style-type: none">• Be able to add integers and rational numbers• Be able to subtract integers and rational numbers
“I Can” Statement	I can add and subtract integers and rational numbers.

Common Core Standards	<p>CCSS.MATH.CONTENT.7.NS.A.1 Apply and extend previous understandings of addition and subtraction to add and subtract rational numbers; represent addition and subtraction on a horizontal or vertical number line diagram.</p> <p>CCSS.MATH.CONTENT.7.NS.A.1.C Understand subtraction of rational numbers as adding the additive inverse, $p - q = p + (-q)$. Show that the distance between two rational numbers on the number line is the absolute value of their difference, and apply this principle in real-world contexts.</p> <p>CCSS.MATH.CONTENT.7.NS.A.1.D Apply properties of operations as strategies to add and subtract rational numbers.</p>
