[CCSS.MATH.CONTENT.7.NS.A.2](#)

Apply and extend previous understandings of multiplication and division and of fractions to multiply and divide rational numbers.

[CCSS.MATH.CONTENT.7.NS.A.2.A](#)

Understand that multiplication is extended from fractions to rational numbers by requiring that operations continue to satisfy the properties of operations, particularly the distributive property, leading to products such as $(-1)(-1) = 1$ and the rules for multiplying signed numbers. Interpret products of rational numbers by describing real-world contexts.
