## Theoretical and Experimental Probability Exit Quiz

## Solve the following problems Permutation and Combination.

1. What is the probability of drawing a king from a 52 card deck of cards?
2. What is the probability of getting a number greater than 3 when rolling a die?
3. What is a probability of drawing a heart card from a 52 card deck of card?
4. Inside a box there are 5 red marbles, 6 green marbles and 4 blue marbles. What is the probability of getting a blue marble?
5. What is the probability of drawing two spade from a 52 card deck of cards?

## Theoretical and Experimental Probability Exit Quiz

## Answer:

Solve the following problems Permutation and Combination.

1. What is the probability of drawing a king from a 52 card deck of card? $P(E)=4 / 52$ or $1 / 13$
2. What is the probability of getting a number greater than 3 when rolling a die? $P(E)=3 / 6$ or $1 / 2$
3. What is a probability of drawing a heart from a 52 card deck of card? $P(E)=13 / 52$ or $1 / 4$
4. Inside a box there are 5 red marbles, 6 green marbles and 4 blue marbles. What is the probability of getting a blue marble? $n(S)=15 ; n(E)=4$ then $P(E)=4 / 15$
5. What is the probability of drawing two spades from a 52 card deck of cards?
$\mathrm{n}(\mathrm{S})={ }_{52} \mathrm{C}_{2}=1326 ; \mathrm{n}(\mathrm{E})={ }_{13} \mathrm{C}_{2}=78$, then $\mathrm{P}(\mathrm{E})=78 / 1326$ or $1 / 17$
